Docker Volume Task

```
[mosama@localhost ~]$ docker volume create my_volume
my_volume
[mosama@localhost ~]$ docker container run  --name container1 -it -v my_volume:/data/ ubuntu
root@75364d1f73a8:/# echo "$(hostname)" > /data/hostname1
root@75364d1f73a8:/# exit
exit
[mosama@localhost ~]$ docker container run  --name container2 -it -v my_volume:/data/ ubuntu
root@6c6daaf0ee14:/# echo "$(hostname)" > /data/hostname2
root@6c6daaf0ee14:/# exit
exit
[mosama@localhost ~]$ docker container run  --name container3 -it -v my_volume:/data/ ubuntu
root@e66c2d0a297a:/# ls /data/
hostname1  hostname2
root@e66c2d0a297a:/#
```
